

PARAS Grammar School – First Term Exam

(Ali Raza bad near Ali Town Station Lahore)

Course Title	Computer Science	Instructor/s	Mr. Aoun Haider		
Class	7 th	Syllabus	Chapter 1, 3		
Time Allowed	2 hour	Date		Total Marks	50
Student Name		Roll No			

Important Instructions/Guidelines:

1. Attempt all the questions
2. Cutting/overwriting is not allowed
3. Return the question paper along with your answer sheet

Q#01: Mark the correct option. [0.5x10 = 5 Marks]	Q#02: Attempt any five short questions: [2x5 = 10 Marks]
1. Set of instructions to solve a problem is a) Instructions b) Directions c) Algorithm d) Design 2. The algorithm which goes through all possible solutions until required solution is found is a) Recursive algorithm b) Brute force algorithm c) Searching algorithm d) Sorting algorithm 3. The loops which have to be terminated are called a) Infinite loops b) Finite loops c) Simple loops d) Intermediate loops 4. The loops which are never going to end are called a) Intermediate loops b) Finite loops c) Infinite loops d) Simple loops 5. _____ is an expansion card which generates output images to a display device such as a computer monitor. a) Expansion port b) Keyboard c) Graphic card d) Express port 6. GPU is added in computer using a) SATA b) USB c) PCIe d) HDMI 7. _____ is the integration of real-world environment and computer generated content. a) AR b) CR c) VR d) All 8. Emerging technology includes a) Robotics b) Artificial intelligence c) Self-driving cars d) All 9. The goal of _____ is to make device act and think like human. a) Artificial intelligence b) 3D printing c) Augmented reality d) Virtual reality 10. _____ is an output device that prints on paper. a) Expansion port b) Printer c) Graphic card d) Monitor	1. Differentiate between brute force algorithm and recursive algorithm. 2. Define Decomposition. 3. Define Graphic Processing Unit (GPU). 4. What are Loops? Write its types. 5. Differentiate between mouse and keyboard. 6. Discuss robotics and its applications. 7. Discuss main properties of scanner. 8. Differentiate between hovering and scrolling. Q#03: Attempt any two long questions: [5x2 = 10 Marks] 1. Write a detail note on <i>Pattern Recognition</i>. 2. How to measure efficiency of an algorithm. 3. What is port? Explain any four types of computer ports.
	Q#04: Identify T/F among the following: [1x5 = 5 Marks] 1. Every flowchart has a <i>Start</i> and <i>End</i> state. 2. We divide the problem into smaller one in pattern recognition. 3. Robotics is branch of artificial intelligence. 4. Ports helps to connect other interfaces with our computer. 5. Keyboard is a peripheral device.

Q#05: Draw flowchart for the given algorithm:	[1x5 = 5 Marks]
--	------------------------

1. *START*
2. *Declare three integer variables n1, n2*
3. *Input the value in n1, n2*
4. *If n1 is greater than n2, then print 'n1 is maximum' and go to step no. 6*
5. *Print 'n2 is maximum'*
6. *END*

Q#06: Identify the type of computer port from the given figures:

[1x5 = 5 Marks]

	
	
	
	
	

Q#07: Write the name of the given flowchart symbol:

[1x5 = 5 Marks]

	
	
	
	
	

Q#08: Identify mode of mouse used among [select, drag and drop, hovering, scrolling, double click, move pointer]:

[1x5 = 5 Marks]

You place your mouse over a button on a webpage and see a tooltip appear.	
You roll the scroll wheel to move down a long document.	
You click once on an icon to highlight it.	
You click and hold an image, then move it to a new position in a presentation slide.	
You move your mouse across the screen without clicking to navigate to the top-right corner.
