Mark only one oval.

☐ XSL

☐ XSLT

☐ XHTML

☐ XML

6. RDF was designed to provide a common way to describe information so it can be read and understood by computer applications.

Mark only one oval.

☐ False

☐ True

☐ Not always true

☐ None of these

7. RDF descriptions are not designed to be displayed on the

Mark only one oval.

☐ files

☐ computer

☐ web

☐ database

8. RDF uses _____ to identify resources.

Mark only one oval.

☐ IP Addresses

☐ Web identifiers

☐ MAC Address

☐ Network Address

9. A Property is a Resource that has a

Mark only one oval.

☐ name

☐ address

☐ location

☐ properties

10. A Property value is the value of a

Mark only one oval.

☐ Resource

☐ Property

☐ Value

☐ None of these

11. The combination of a Resource, a Property, and a Property value forms a

Mark only one oval.

☐ Statement

☐ Program

☐ Function

☐ Module

12. Which of these is a valid statement ?

Mark only one oval.

☐ "http://www.academictutorials.com/RDF is Jan Egil Refsnes"

☐ "The author of http://www.academictutorials.com/RDF"

☐ "The author of http://www.academictutorials.com/RDE is Jan Egil Refsnes"

☐ "http://www.academictutorials.com/RDF"

13. In the statement "The author of <http://www.academictutorials.com/RDF> is Jan Egil Refsnes", what is the predicate ?

Mark only one oval.

- ☐ The author of
- ☐ <http://www.academictutorials.com>
- ☐ Jan Egil Refsnes
- ☐ author

14. Which of these are not the main elements of RDF ?

Mark only one oval.

- ☐ root element
- ☐ <RDF>
- ☐ </RDF>
- ☐ <Description>

15. The property elements can also be defined as

Mark only one oval.

- ☐ values
- ☐ attributes
- ☐ functions
- ☐ modules

16. RDF _____ are used to describe group of things.

Mark only one oval.

- ☐ values
- ☐ attributes
- ☐ containers
- ☐ modules

17. Which of the following are not the RDF elements which are used to describe groups ?

Mark only one oval.

- ☐ <Bag>
- ☐ <RDF>
- ☐ <Seq>
- ☐ <Alt>

18. A collection is described by the attribute

Mark only one oval.

- ☐ rdf:parseType="Collection";
- ☐ rdf:parse="Collection"
- ☐ rdf:Type="Collection"
- ☐ rdf:parseType="Collection"

19. What is DCMi ?

Mark only one oval.

- ☐ Data Core Metadata Initiative
- ☐ Dublin Core Metadata Interface
- ☐ Dublin Core Metadata Initiative
- ☐ Data Core Metadata Interface

20. RDF Schema does not provide actual application-specific

Mark only one oval.

- ☐ objects and properties
- ☐ classes and properties
- ☐ functions and properties
- ☐ files and properties

21. Using RDFS when calling subject then it will be the _____ changing.

Mark only one oval.

- ☐ Range
- ☐ Property
- ☐ Inference
- ☐ Domain
