

Quiz 1: Semantic Web

* Required

1. Email address *

2. Write Your name. *

3. Write your Registration Number. *

4. Select section *

Mark only one oval.

☐ A/B

☐ C

Solve MCQs

Total questions = 22
Total Time = 25 mins

5. Semantic web will not be searchable in

1 point

Mark only one oval.

☐ Odd Text

☐ Free Text

☐ Text

☐ All of the above

6. To access semantic web, we will need some the ____ to help us.

1 point

Mark only one oval.

☐ Hardware

☐ Software

☐ Website

☐ Tool

7. Often RDF files describe other

1 point

Mark only one oval.

- ☐ XSL files
- ☐ XSD files
- ☐ RDF files
- ☐ OWL Files

8. _____ is data about metadata.

1 point

Mark only one oval.

- ☐ XML
- ☐ XSD
- ☐ OWL
- ☐ RDF

9. RDF was developed by people with academic background in

1 point

Mark only one oval.

- ☐ Programming Languages
- ☐ Web Designing
- ☐ Human Computer Interaction
- ☐ Logic and Artificial Intelligence

10. Semantic Web is not a very fast growing

1 point

Mark only one oval.

- ☐ Technology
- ☐ Software
- ☐ Tool
- ☐ Website

11.

If information about plants, insects, soil types were stored in RDF files, intelligent web applications could collect information from many different sources, combine information, and present it to users in a meaningful way.

1 point

Mark only one oval.

- ☐ True
- ☐ False
- ☐ Not Always True
- ☐ Not always False

12.

RDF is

1 point

Mark only one oval.

- ☐ Resource
- ☐ Programming Language
- ☐ Framework
- ☐ Markup Language

13.

Semantic Web uses RDF to describe

1 point

Mark only one oval.

- ☐ Web Controls
- ☐ Web Resources
- ☐ Web Contents
- ☐ None of the above

14.

RDF is the abbreviation

1 point

Mark only one oval.

- ☐ Resource Description Framework
- ☐ Record Data Framework
- ☐ Resource Data Framework
- ☐ Record Description Framework

15. Semantic Web describes the relationships between things (like $A=B$ and $Y=Z$) and the properties of things (like Length, size, weight, age, and price) 1 point

Mark only one oval.

- ☐ False
- ☐ True
- ☐ Not always True
- ☐ Not always False

16. Semantic Web is not _____ between web pages. 1 point

Mark only one oval.

- ☐ Text
- ☐ Appearance
- ☐ Links
- ☐ All of the above

17. Syntax of a language defines the rules for building the language 1 point

Mark only one oval.

- ☐ Statements
- ☐ Classes
- ☐ Objects
- ☐ Structures

18. RDFS Statements are built with 1 point

Mark only one oval.

- ☐ Without any rules
- ☐ With rules
- ☐ With proper rules
- ☐ Syntax rules

19. RDF, schema, and inference languages will make all the data in the world look like one huge 1 point

Mark only one oval.

- ☐ Database
- ☐ Data Table
- ☐ Data Book
- ☐ Data Structure

20. If HTML and the Web made all the online documents look like one huge 1 point

Mark only one oval.

- ☐ Internet
- ☐ Book
- ☐ Table
- ☐ Website

21. Which language defines desirable computational properties for reasoning systems. 1 point

Mark only one oval.

- ☐ OWL 2
- ☐ OWL DL
- ☐ OWL Lite
- ☐ OWL Full

22. _____ is a data model that uses keywords to describe resources. 1 point

Mark only one oval.

- ☐ OWL DL
- ☐ RIF
- ☐ SWRL
- ☐ SKOS

23. Which language defines standard syntax for interchanging rules?

1 point

Mark only one oval.

- ☐ SKOS
- ☐ OWL Full
- ☐ RDFS
- ☐ RIF

24. _____ is a query language for the graph-based data model for RDF.

1 point

Mark only one oval.

- ☐ SQL
- ☐ DPARQL
- ☐ SPARQL
- ☐ PLSQL

25. _____, developed as a mechanism for Gleaning Resource Descriptions from Dialects of Languages.

1 point

Mark only one oval.

- ☐ RDFa
- ☐ RDFS
- ☐ GRDL
- ☐ GRDDL

26. Agents fully aware of a layer should also be able to interpret and use information written at lower levels.

1 point

Mark only one oval.

- ☐ Downward compatibility
- ☐ Upward compatibility
- ☐ Upward Incompatibility
- ☐ Downward Incompatibility
