Course Title:	Information Security			Course Code:	CSC432	Credit Hours:	3(3,0)
Resource Person:	Dr. Muhammad Sharjeel			Programme Name:	BSSE		
Semester:	6 th , 8 th	Batch:	FA21, FA22	Section:	A, B	Due Date:	30-05-2025

Assignment – 3

[CLO-3 – Analyze various information security technologies]

Q1.

The main objective of this assignment is to understand hacker techniques used to circumvent access controls.

The website HackThisSite.org was created by hacker Jeremy Hammond to teach hacking techniques. Visit HackThisSite.org and register by creating an account. It is strongly recommended that you create a new "fake" email account and use it for registration.

Your task is to complete the Hacking Challenges. These challenges are organized as missions, each providing a brief description of what you are expected to do.

Submission:

You must submit a report (Word or PDF) containing screenshots of each mission you completed. The report must include sufficient proof that you personally completed the challenges.

Submission date:

30 May 2025
